1. Spring is d-busy time. Anything you can get done now is that much clear time for spring activities. You can get your planting done-safely and out of the way.
2. By spring plants are tired out with the long winter. Fall is the time all plants are filled with hormones and health. They take much more kindly at that time to transplanting. True, in spring they can start growing at once, in fall they must wait six months, but fall planting has a big health advantage for them. And when spring comes, they get all of it-right in your garden.
3. Evergreens planted in September do not have to wait. Their roots can start growth at once. The only danger is a d autumn, and this very seldom occurs in climates of out customers. (North-east America)
4. Deciduous trees and shrubs may not grow in NovemberDecember, but their roots do settle firmly in the earth if solidly planted. No winter storage is as safe as nature's.
5. Some plants must be planted in fall-bulbs, peonies, etc. All can be so planted in the sizes we offer here. If not suitable, it is not listed in this catalog.

## RULES for SAFE AUTUMN PLANTING

1. Select hardy material. Check zone map below to locate your own climate, compare with zone ratings in plant descriptions.
2. Order early enough. There is a right time for nearly all kinds of plants. The front cover shows an index of dates.
3. Plants need watering, even in fall with no growth of leaves, water freely until freezeup for good root growth.
4. Plant in proper soil. Usually just good garden soil mixed with humus, but special treatment often noted in description.

## How to Orrier

Fill in the order form and enclose check. Shipment is made with express charges collected on arrival. You will get a prompt acknowledgement indicating approximate shipping time.

## ORDER NOW DON'T WAIT

Unlike other things you buy, nursery stock must be ordered in advanceWhy? Because our whole year's shipments come in a few months' time and there is never enough help. Shipments are scheduled long in advance. Order now, we will ship at proper time.

There is a northern limit for every plant, beyond which it cannot live. For practical use the map above divides the country into Zones. Each plant description in this Guide has a related Zone limit. Look up your garden on the map and you can select hardy material.

Photo: Hybrid Rhododendrons, our most popular item. Showing box and plant. Water well and protect from wind this winter.

## GRADES OF NURSERY STOCK

\& Indicates a small plant not yet shapely. (No mark at all indicates fairly shapely landscape grade.)

Seedlings not yet transplanted. Plant 3 in. apart in shaded beds, for evergreen kinds. Deciduous trees and shrubs are quicker growing and need less care, but should be cut back upon planting.

Transplants. Bushier roots and tops. Space 5 or 6 inches apart in beds for evergreens, and shade the first summer. In planting evergreens be careful to keep package moist, remove only one plant at a time to set in the ground, otherwise roots dry out. Deciduous trees and shrubs are much hardier and need no special care.

Twice transplanted stock. Much bushier in roots and tops. In deciduous trees and shrubs, "XX" grades are specimens. In evergreens, which grow much more slowly, space 8 to 10 inches apart, at least, and no shade is needed. These are the largest evergreens that can be shipped with little expense, perhaps 10 to $15 \%$ for express.

Any of the above can be grown in pots, and thus handled with a pot ball almost any time of year. Just dig a hole to fit, press earth around on all sides, soak. Space twice the size of the pot at least ( 2 inch pots space 4 inches, etc.). Very small pots need shade first year, larger sizes do not. Much safer than bare root stock, but costlier for express. Perhaps $25 \%$.

Balled and burlapped landscape specimens. Usually only evergreens are balled. Deciduous shrubs and trees are handled bare root in specimen sizes, the only special care is to watch they are not planted deeper than they stood in the nursery. (Check soil mark in lower stem.) B\&B stock costs are high for express- $50 \%$ of cost of stock or more. Bare root deciduous trees and shrubs cost $20 \%$ or less.

## bargains in larger young trees

For those who want quick results yet not have to pay for full specimens, we offer nice, well-rooted trees between 4 and 8 feet high. Yet you save 2 to 4 years over small seedling sizes at little extra cost. Packing included if cash accompanies order.

TRANSPLANTS do give quick results. They are young and transplant easily and grow more vigorously than older stock.

## Young TREES AT QUANTITY PRICES

Among "slow" trees known to have reached 30 feet or more in their first 15 years of life are Red Oak, Pin Oak, most Maples, Liriodendron, several Birches, Black Locust and Linden.
(S) SEEDLINGS grow rapidly. Soak well after planting, and prune back. To keep a single stem: prune out all side twigs, and later again cut away all but one single stem.

# Native with old leaves. <br> <br> ARISTOCRATS 

 <br> <br> ARISTOCRATS}

These five flowering evergreen shrubs are shipped from the mountains of North Carolina. They are dug from natural growth in the open (not in woods) hence will succeed in normal garden conditions. Plant late Aug. to late Oct. safely. Soak heavily after planting. Mulch heavily

## SIZE 1: AS SMALL AS SAFE TO SHIP <br> $8-12$ inch seedlings (1 stem) with ball

This special "Young Aristocat" grade measures about 12 inches dug with a little earth left on roots, but not burlapped. Plants weigh about one pound only. This stock is not to be compared for a minute with ordinary collected plants. It is, on the contrary, all carefully dug, the greatest pains being taken to preserve the roots. Carefully packed, it is easily planted and makes a quick start. Shipped from North Carolina, express runs only 8 c each (in 100 lots).

## DECIDUOUS S:PR FLOWERING

Bloom young, usually in second year. But after ten years they need more space. So plant 3 feet apart and arrange that every second shrub can be removed in later years. (Dwarf shrubs take just half this spacing.)

PRUNING SHRUBS-Flowers come on old wood, so the rule is to prune when in bloom or just afterward. Thus no potential bloom is lost. Natural shrub shape is to have many main stems in a clump all ascending from the ground, so prune out old branches.

## Hybrid Grapes

No permanent canes needed; only a short trunk or shank. Grapes grow on new wood, which is pruned away each year. Zone V.

Grape Culture calls for plenty of humus in the soil. Old manure is far the best form, to produce vigorous spring growth. Extra moisture is needed as fruits fatten in summer. Otherwise grapes may be small, dry.

The European Grape (Vitis vinifera) is far superior to our native grapes. However, it has not the stamina to withstand sub-zero weather and succumbs to disease, while our hardy native grapes remain immune. These hybrids combine American health with European flavors.

## 5 Popular Hybrids <br> $\$ 2.00$ each, 3 for $\$ 4.50 \mathrm{ppd}$.

## INTERLAKEN SEEDLESS

New hybrid seedless hardy in Zone IV. Very sweet, meaty and crisp. Amber color, tangy flavor. Ripens early (Sept. 1st).

## ROMULUS SEEDLESS

New American-European hybrid to Zone IV. Mid-Sept. Yellow, sweet, meaty. Fine seedless variety.

## GOLDEN MUSCAT

California type, fine aroma. Large juicy, sweet and tender. Zone VI.

## STEUBEN (Blue-Black)

Exquisite flavor. Huge, long slender clusters. (Zone IV). Absolutely free from rot and mildew.

## SEIBEL No. 9110

Yellow table grape of unusually fine dessert quality. Bears young.

# FRUITS All can be planted in Nov.-Dec., almost a year gained over next Spring and identical success. A sod mulch helps. 

## Huge Hybrid Blueberries

## UNUSUAL

 BERRIESNew American Mulberry
Ever - bearing, from June until September. Large, refreshing berries without the mawkish sweetness. Zone IV. 3 to 4 ft .
$\$ 4.20$ each, $10 \$ 35.00$

## Dwarf Juneberry

Amelanchier berries are known as "Bilberries" or "Serviceberries." Dark red fruit in July. This form grows 12 ft . Zone II. 11/2-2 ft. plants:
\$2.25 each, 10 for $\$ 15$

## Highbush Cranberries

Large fruited, heavyyielding type of Viburnum trilobum-high in pectin. Zone I. Make sauce or jelly, same as with cranberries, but strain to keep out pits. 2 feet plants:
\$1.65 each, $10 \$ 13.50$

## Adams Elderberry

The large berries and extra fruit clusters are a decided improvement for pies, jam and wine. Zone IV.
1 $1 / 2$ feet plants:
\$1.85 each, $10 \$ 15.00$

Really beautiful as specimens or in hedges. Suited for use in small quantities in the small garden. A 100 -foot hedge will pay about $\$ 25$ worth of berries a year! (Spaced 18 ins.)

## Why Wait? Plant Some NOW!

And enjoy the berries sooner. Not only will add to your garden but pay back cost many times over! Hardy throughout U.S.A.

Jersey. Large, vigorous. Hardiest. Early July. Rancocoas. Early, good quality. Pemberton. Large, mild and bland.
Burlington. Large, latest of all.
Rubel. Tall grower, erect. Late.
Dixie. Huge, high flavor.
Weymouth. Earliest of all. Best for cooking.
Concord. Midseason. Upright. Fine quality. Stanley. Early July. Tall. Large berries.

Set the plants in beds 4 feet apart. Several varieties should be included in planting, as an exchange of pollen is necessary to produce good crops of berries. Or order "mixed" for all varieties are almost equally fine.

Blueberries require an acid soil containing peat or other rotted vegetable matter. They need a moderate supply of soil-moisture.

# NUT TREES 

There are good nuts to be grown in the north. Chestnuts from seed are young, heavy bearers. The grafted Walnuts are hardier and also bear heavily and young. The first two years mulch well with hay or straw. Water if drought comes. Do not plant deeper than they were in nursery.

## BLACK WALNUTS-Zone IV

One of our most beautiful native trees, growing well in any fertile well drained soil. The grafted sorts bear their first nuts commonly in the third to fifth year. Thomas is a rapid-growing kind. The meat is attractive and tasty, falls out easily in halves.
2 to 3 ft . . $\$ 2.75$ each, 5 for $\$ 11.75$

## ENGLISH WALNUT (Carpathian)

Fast growing to $30-35$ feet. No spraying necessary. Good, flavorsome nuts, easy to open. A boon for northern gardeners. Zone V. Glossy dark-green leaves.
2 to 3 feet.... $\$ 4.00$ each, 5 for $\$ 18$

Prunus maritima grows 6 to 8 ft . high, hardy into Zone III. Thrives in gardens better than on seashore. Good drainage. Fine useful plums.

18-24 in. $\$ 1.95$ each
3 \$5.00

## MEDLAR

Mespilus germanica. Zone V. Small tree, with pear-like fruit, of unique, soft, acid flavor, must ripen after picking. A favorite of medieval days, still liked.

2 yr . grafts 3 to 4 ft ., $\$ 5.00,3$ for $\$ 13.50$

Native Persimmon
Diospyros virginiana makes a 20 foot tree, moist soil. Zone IV. Fruit late fall, like figs.

## SELF-STERILE FRUITS

Many fruits do not bear good crops if planted separately. Pollen from nearby trees of different variety is often needed. Noted on next pages by:

- -self-unfruitful. Do not plant by itself, but with another variety of the same fruit.
( $\mathbf{P}$ ) -Good pollenizer.

# Dwarfed Fruits 

Available in All Varieties Listed.

A tree whose fruit is as large or larger than ordinary, but which never grows very tall-perhaps ultimately 12 to 15 feet. Space 12 ft . apart.

Golden Glow. The spectrum yellow, very fragrant.

## 

## ROSES

EACH: $\$ 2.25$ 3 FOR S 6.25 DOZEN: 522.00

This new race of roses adds to unusual hardiness a character of improving with age, rather than slowly deteriorating as most hybrid teas do. Easy to grow and bring into bloom. Disease-resistant, unusually hardy.
HARDINESS: Zone IV, but roots will survive still colder climates. Even if tops damaged, new growth will bloom.

## BROWNELL HYBRID TEAS

Shades of Autumn. Red and yellow.
Tip Toes. Spicy fragrance. Orange and pink.
Dick Wilcox. Deep red, magnificent vigor.
V for Victory. Large, double, yellow, fragrant, profuse.
Country Doctor. Large, recurved silvery pink satin. Sun Up. Rich, clear china-rose.
Cedric Adams. Scarlet and crimson, large, double. $\star$ Red Duchess. Robust sturdy large red. Outstanding fragrance. Brilliant, free to flower.
Queen o' the Lakes. Sensational large crimson.

## EVERBLOOMING PILLAR ROSES
